1 button game but meh, definitely not bad.. I get that it must be an alpha or beta, but its still not worth 2 dollars because its lacking features that would be good like a shop or something to use the coins.. no way in hell its worth the price very basic repetitive and unimaginative almost no controls its just limited and pointless i felot there was no clear win or lose and the graphics style wasnt very good. TL;DR

It's okay - there's not much to do after the 20 minutes it takes to complete the campaign, and the game is mechanically less satisfying than Extreme Road Trip.

I was hoping this would play somewhat like Extreme Road Trip, but it lacks the variety of playing as different cars, and the endless mode is completely pointless. The reasons being that it's impossible to die, it's still segmented into levels, your score is reset after each level, the leaderboard doesn't function, and coins aren't used for anything. I'm still wondering why the tutorial says to "collect coins to increase your budget."

The only goals in the game are to complete the 12 levels of the campaign, and to collect a souvenir from each. There's no rewards for this, only score bonuses. You can also go for the (in-game only) achievements to extend your playtime for maybe about an hour and a half, but then there's nothing left. This is a bit of a lazy port. It's not bad, but I can't recommend it either.. Great Game !!!!!!!!!!!!!!!!!!!!!!!

Short game, but funny. I'd like the devs to had some achievements and trading cards.... Took me about 20 minutes to figure out how not to crash your car into every hill there is. Too bad this game is only 20 minutes long.

Short but funny, well soundeffects and good if you wait for your friend who just wants to finish his "speed" run.. This game has been out for over 1 year and hasn't received 1 update the game needs a lot of work.

[I like tiny wings and therefore its hard to 'dislike' this game, but the rampant plagiarism irks me](#)

[Get it when it's in a bundle or on sale. Played through the bad unity mobile port in ~30 min and the screaming was annoying as hell. I bought it for 0.89€ and it's not worth it. -10/10](#)

[They were too lazy to convert the ingame achievements to work with steam.](#)

[Quick cash grab for the Devs.. 10/10 would drive again. Meh... It's simple. Something I'd let my nephew or niece play when they're over. Only recommended if you got kids.. Shouldn't complain too much about this little gem. It's just a little casual game to pass the time, and the price is perfect. Needs a few tweaks here and there but nothing major. Gotta get that controller support in the game\(Which would be way better than the mouse\) and add some more levels \(DLC\). Kinda has that retro 50's theme going. I like that. The music is cute and I love the sound effects. Especially the kids screaming while going up and down the hills and pulling off stunts. Haha It's a yes for me!! :\)](#)
